

Scope of Industry Activities Column

The objective of the Industry Activities Column is present a wide range of topics and articles related to the Antennas and Propagation industry. Subject matter includes:

1. Interviews with antenna and electromagnetic related technology company executives and founders to get their perspectives and opinions on the status of our field and future directions. Also on the journey that has taken them to where they are today.
2. Articles on important historical developments that have enabled our industry to advance to where it is today.
3. Articles related to manufacturing, in particular on how to take bread-board prototypes to commercial products and the manufacturing processes and rigor required to do so.
4. Articles highlighting local companies but on a global scale, in an attempt to show the paths taken, funding mechanisms as well as the potential challenges faced depending on geographical location.
5. Articles related to how industry and academia can and have successfully collaborate to achieve shared goals.

Articles are generally not technical in content.
