

CALL FOR PAPERS

IEEE ANTENNAS AND PROPAGATION MAGAZINE SPECIAL ISSUE ON

Metamaterials and Metasurfaces

Submissions are welcome for a special issue on Metamaterials and Metasurfaces. Theoretical, experimental, and application-oriented contributions are within the scope of the issue. Tutorials and Reviews from recognized experts in the field are welcome as well as excellent research contributions that could be of interest for the entire Antennas and Propagation community.

Some special guidelines apply to this special issue:

- Papers for the special issue are **limited to 6 pages** or less for the main paper (please use the default two-column IEEE Transactions template). Please submit through our ScholarOne Manuscript Central portal and note that you are submitting for the special issue in your cover letter.
- The style of the paper should be as written for a Magazine, which means the text of the main paper should be understandable to the general audience of the Antennas and Propagation Society with little specific background in the topic and technical detail should be kept to a minimum. There is a limit of a **maximum of 6 equations** allowed for the main paper.
- All additional technical details, mathematical developments, extra experiments, multimedia, and more specialized content addressing those interested in going deeper in the topic of the paper (such as equations, proofs, etc.) have to be included in a **mandatory online supplementary section. There is no page limit for this section.** The supplementary section will be linked to the main paper on IEEE Xplore, and we will include a QR code in the printed magazine that will lead directly to it.
- Contributors are encouraged to contact the magazine Editor-in-Chief (apm-eic@ieee.org) before preparing and submitting their articles to inquire whether their prospective submission is within the scope of the special issue. This is always recommended, but it is mandatory when the article is a tutorial or a review.

Please follow all other guidelines for authors for the IEEE Antennas and Propagation Magazine (<https://www.ieeeaps.org/publications/ieee-antennas-and-propagation-magazine>). The Editor-in-Chief reserves the right to automatically reject all papers that do not follow these guidelines, scope, style, or subject matter.

SUBMISSION DEADLINE:
15 February 2021
